MIL-PRF-22885/11H

REQUIREMENTS:

Dimensions and configuration: See figure 1. The switch modules shall be capable of mating with indicator lights in accordance with MIL-PRF-22885/10 and /16 to form the MIL-PRF-22885/9 and /15 illuminated pushbutton switches, respectively. Basic switch elements shall be permanently fixed to switch bracket or frame. The basic switches shall be category I switches in accordance with MIL-PRF-8805/2, part numbers MS25085-2 and -9, listed on QPL-8805, or category II parts with integral leaf actuators or marking changes, as required. The use of non-category I or II basic switches may be authorized provided that the qualification inspection includes all applicable tests of the complete MIL-PRF-22885/qualification inspection table.

Enclosure design: 1 (unseated).

Temperature characteristic: -55°C to +71°C.

Vibration grade: 2 (10 to 500 Hz, 10 g peak).

Operating: A (momentary action) and B (alternate action).

Weight:

2 pole switch: 1 ounce maximum.

4 pole switch: 1.2 ounces maximum.

Operating characteristics:

Operating force: Measurement to be taken at front of lens with switch module assembled to indicator light.

2PDT momentary: 4 pounds maximum.

4PDT momentary: 4 pounds maximum.

2PDT alternate: 6 pounds maximum.

4PDT alternate: 7 pounds maximum.

Dielectric withstanding voltage at reduced barometric pressure:

Altitude: 50,000 feet (MIL-STD-202, method 105, test condition B).

Electrical endurance: See tables I and II.

Low level life: Applicable to gold contact switches, PIN's M22885/11-05 through -08.

Logic level circuit: Applicable to gold contact switches, PIN's M22885/11-05 through -08.

Marking: Basic switch number and terminals shall be identified as shown on figure 1.

MIL-PRF-22885/11H

Qualification inspection (group submission): Qualification is in accordance with MIL-PRF-22885/9 or /15 provided that qualified category I or II basic switches in accordance with MIL-PRF-8805/2 are utilized. the entire MIL-PRF-22885 qualification inspection table is applicable if non-category I or II basic switches are used in the assembly.

Part or Identifying Number (PIN): M22885/11- (dash number from table III).
